

Evidence on every number. Judgement always.

This guide covers the Hysaab logo, colours, type and the small system of marks that makes the brand recognisable. Every measurement here comes from the artwork files in the brand pack.

Wordmark · Option A, Tick-y Schibsted Grotesk · JetBrains Mono · Caveat Ink · Paper · Highlighter · Review Red

The brand is a **working paper**.

Accountants check work by marking it. They tick what they recomputed, trace figures to source documents, highlight what matters and draw a double line under a total that balances. Hysaab's agents do that preparation, and people make the call. The brand borrows the reviewer's tools to show it.

- ✓ **Evidence first.** Show the working. A claim that has a number gets its source.
- P **People decide.** Agents prepare; a person approves. The brand never implies otherwise.

- T **Calm until it matters.** White paper, black ink, one highlight per section. Save loud moments for results.
- B **Plain and specific.** Real figures, labelled as samples where they are samples.

The **wordmark**.

Lowercase hysaab in Schibsted Grotesk Black, with one custom letter. The y is a tick: two mirrored arms, a long arm that rises level with the h, and a tail in review red. There is no separate symbol in the wordmark. The y is the symbol.

W/P ref B-3 · Construction

Font units · 2048 per em

Built from the typeface, **not drawn by eye.**

The tick-y is constructed on Schibsted Grotesk Black's own metrics, so its weight and heights match the letters around it exactly.

- 19.8°** Angle of each arm from vertical. The two arms mirror each other exactly about the axis.
- 448** Arm width, measured horizontally. The same as the arms of the typeface's own y.
- 0** The arms meet on the baseline. The black V ends there with a level cut.
- 1080** The short arm stops at the x-height.
- 1500** The long arm rises to the ascender, level with the tops of h and b.
- 390** The red tail continues the long arm down to the descender, cut level.
- 62** Spacing. The closest gap between every pair of neighbouring letters is 62 units, the typeface's own gap. The long arm hangs over the s.

W/P ref **B-4** · Clear space and minimum size

x = the x-height of the wordmark

Give it room.

Keep a clear space of one x-height (x) on every side of the wordmark. Nothing else, including text, other logos and the edge of the page, goes inside it.

hysaab

48 px · headers

hysaab

28 px · nav bar

hysaab

18 px · minimum on screen

v

16 px · below this, use the mark

Minimum size · wordmark 18 px tall on screen, 6 mm tall in print · mark 16 px

Height measured from ascender to descender

Six things **not to do.**

The tick, **on its own.**

When the full word will not fit, use the mark: the tick-y alone. In icons it is centred on its bounding box, so the margin is identical on the left and right, and identical top and bottom. It fills 60% of the icon height.

64483216

Favicons · the mark grows to 72% at small sizes so the tail survives

Profile pictures · circle-safe; the mark stays inside the circle crop

W/P ref B-7 · Colour

WCAG 2 contrast · AA text needs 4.5:1, large text and graphics 3:1

Four colours do the work.

Paper and Ink carry almost everything. Highlighter marks the one claim per section that matters. Review Red is for tick marks, the logo tail and anything a person has to look at.

Pairings to know

PAIR	EXAMPLE	RATIO	USE
Ink on Paper	Aa 123	18.47:1	Everything
Ink on Highlighter	Aa 123	14.61:1	Highlighted claims, primary buttons
Review Red on Paper	Aa ✓ T	5.00:1	Marks, short labels
Review Red on Highlighter	✓ T B	3.96:1	Marks and the logo tail only, not text
Review Red on Ink	✓ T B	3.69:1	Graphics only. Use Signal Red for text
Signal Red on Ink	Aa ✓ T	5.45:1	Marks and text on dark
Off-white on Ink	Aa 123	16.76:1	Text on dark

CMYK values are straight conversions for reference. Proof printed colour against a physical sample. Red never means “error” on its own: always say the state in words.

One voice, three hands.

How Hysaab sounds

Write like a good reviewer.

Short sentences, real figures, plain verbs. Say what happened and who decides.

DO ✓ “312 of 314 bank lines matched overnight.” ✓ “Agents prepare the work. You make the decisions.” ✓ Label samples: “Illustrative data”, “Sample data”. ✓ Name the state in words: “Posted”, “Waiting on you”.	DON'T ? “Revolutionary AI that transforms finance.” ? Imply the product decides, signs or concludes on its own. ? Present sample numbers as customer results. ? Promise zero errors or guaranteed compliance.
